

Squark Dashboard — Summary of Changes

All updates delivered to date · consolidated and de-duplicated

Everything below is listed once, grouped by module. Items marked **NEW** are features that did not exist before; **FIX** means something was behaving incorrectly and has been corrected.

NEW = new feature **FIX** = corrected behaviour

A Timesheets

- 1 Changed to a calendar view instead of a list.
- 2 Bigger tiles, with hours shown in a larger, readable font.
- 3 Days are clickable — clicking a day opens its detail panel.
- 4 The day panel shows every entry filled that day (PID, task, hours, billable, notes), with Assign PID, Delete and "Log for this day".
- 5 Separate logs table removed — logs now live inside the day panel.
- 6 Backfill moved into a collapsed "Backfill an older month" toggle.
- 7 **FIX** Calendar updates in real time after you log or delete — no refresh needed.
- 8 **NEW** Maximum 16 hours can be logged against one day.
- 9 **FIX** A half-day leave keeps its 4-hour target (it used to wrongly clear the whole day).

B Attendance

- 1 **FIX** The "24 hours" glitch — shifts are capped at 16 hours.
- 2 Shifts left open are closed automatically at 11:59 pm.
- 3 Punch-in popup on first login of the day.
- 4 **NEW** "Punch in (Work from home)" — punches you in and raises a WFH request; its status (pending / approved / declined) is shown in the popup.
- 5 **FIX** Present is never shown without a punch. Filling a timesheet alone no longer marks a day present.
- 6 **FIX** A punch after midnight now counts for the correct day.
- 7 Area column — taken from where the person actually punched in.
- 8 Full column names: Punch In / Punch In Location / Punch Out / Punch Out Location.
- 9 Date picker to view punch locations for any day in the past year.
- 10 CSV export for any date range you choose.
- 11 **NEW** Admin view of who is working from home vs office — today, past week, 2 weeks or 30 days.
- 12 **FIX** Regularization requests no longer error on submit.
- 13 **NEW** "Worked past midnight" regularization option.
- 14 Admins and Super Admins are now notified of comp-off and regularization requests.

C Leave & Comp-off

- 1 **NEW** Half-day leave — morning or afternoon.
- 2 Four clear request options: full-day leave, half-day leave, comp-off credit, comp-off avail.
- 3 Comp-off claim can be half day or full day.
- 4 **FIX** A half-day comp-off now earns half a day. It used to earn a full day.
- 5 Approved comp-off shows in attendance as Present / Half-day, marked "comp-off".
- 6 Approved comp-off becomes a required working day on the timesheet (8h / 4h).
- 7 Pending comp-off shows an amber asterisk; approved shows a "CO" marker.
- 8 **FIX** "Comp Off" is always visible as a leave type, even at zero balance.
- 9 Balance card is bigger and clearer — "3 out of 4 remaining" instead of "3 / 4 left".
- 10 You cannot avail more comp-off than you have earned.
- 11 **NEW** Pending leave, WFH and comp-off requests are visible in every calendar.

D Team Capacity & Roles

- 1 **FIX** The assign error when adding a PM without hours.
- 2 One person can hold several roles on the same task (PM + Reviewer + Analyst).
- 3 Every assignment has its own hours and deadline.
- 4 Assign directly from the capacity board: person → project → task → role, hours and deadline.
- 5 **FIX** Today is no longer shown as "Present" before anyone has punched in.

E Projects

- 1 **NEW** "Save as template" now sticks — a saved type appears for everyone next time.
- 2 Project type shown as a tag.
- 3 Card layout reordered: Name → PID → Phase → Type.
- 4 List view now shows the PID.
- 5 **FIX** Date pickers — the deadline could previously only pick an earlier date.
- 6 **NEW** A project cannot be marked complete while tasks are still open.
- 7 IDEA phase removed.
- 8 **NEW** On completion the system asks for: client delivery date & time, working hours (auto-filled from timesheets, editable) and actual hours (typed manually).
- 9 Delivery date and hours appear on the project, PID ledger, reports and digest.

F PID

- 1 **NEW** A PID is never assigned automatically — it must be generated on purpose.
- 2 PID text is bigger and bolder.
- 3 **NEW** Re-initialize a completed or closed project from the PID ledger, keeping the same PID.
- 4 Ledger detail shows the delivery date and hours.

G Calendar

- 1 All calendars now start on Monday.
- 2 **FIX** New colours — every type is clearly different. Green now only means “completed”.
- 3 Pending and approved leave / WFH / comp-off are shown in all calendars.
- 4 **FIX** Multi-day leave now shows on every day, not just the first.
- 5 Team Calendar rewritten — frozen date row and member column, with avatars, names and designations.
- 6 **NEW** Team Calendar has a Company row for holidays and org-wide events.
- 7 Upcoming panel limited to this and next month, and can be collapsed.
- 8 **NEW** Celebrations in Upcoming — birthdays and wedding anniversaries.
- 9 Profile captures marital status and wedding anniversary.

H Daily Digest (Super Admin only)

- 1 **NEW** Now a proper module under Administration, visible to Super Admins only.
- 2 Every number is clickable and opens the rows behind it.
- 3 Projects show PID, type, dates, delivery, hours, progress, PM and full team — all linked.
- 4 Tasks show project, status, deadline, hours and each assignee’s own hours and date.
- 5 Hours logged per person, expandable to every individual entry.
- 6 **NEW** “Coming up — next 5 working days”, day by day (weekends and holidays skipped).
- 7 Send time is admin-editable, with a “Send now” button.
- 8 The digest notification links straight to the module.
- 9 **NEW** Full CSV export covering every section (it was 2 columns).

I Reports

- 1 Activity digest removed — it now lives in the Daily Digest module.
- 2 **NEW** Project Type column.
- 3 **NEW** Search by PID, project or client.
- 4 **NEW** Expanding a project spotlights it — highlighted row, bordered panel, everything else dimmed.
- 5 The expanded panel shows type, client, all dates, delivery, working / actual / logged / estimated hours, tasks, patents, team and per-task staffing.
- 6 **NEW** Download a single project as CSV.
- 7 Full CSV export — 30 columns plus a task-and-staffing section (it was 7 columns).

J Home

- 1 **NEW** “Attendance & comp-off requests” card for HR / Admin / Super Admin — approve or reject from the homepage.

K Colours

- 1 Timesheet calendar colours match the attendance calendar — the same meaning is the same colour.
- 2 PID Ledger colours match the project phases (Working = blue, Completed = green; they were effectively swapped).
